

Property Lines

The following are some tips on finding the iron stakes that mark your property lines:

1. Obtain a Certificate of Survey. Hire a surveyor to come out and survey your property. The City of West St. Paul does not have surveyors to perform this service.
2. Measure from the curb to where the property corners should be. Typically this is 10-13 feet from the curb (you may have to dig for them).
3. Utility boxes (cable TV and electric) are typically on the property line.
4. Rent a metal detector to help you find the stakes that are buried.
5. Call Gopher State One (651) 454-0002 to mark utility lines before digging.
